

SALES PERFORMANCE ANALYSIS

Sandhiya M
Data Analytics Intern
InternSpark Internship Program

Objective

The objective of this project is to analyze sales performance across different regions and product categories. The analysis aims to identify top-performing areas, understand sales trends, and provide actionable business recommendations for improving sales performance.

Dataset Information

- Dataset Name: Superstore Sales Dataset
- Source: Kaggle
- Tools Used:
 - Python
 - Pandas
 - Matplotlib

The dataset contains sales transactions including customer details, product information, regions, and sales values.

Data Cleaning and Preparation

The following data preparation steps were performed:

- Checked dataset structure using `df.info()`
- Identified missing values using `df.isnull().sum()`
- Generated descriptive statistics using `df.describe()`
- Verified column names and data types
- Prepared data for visualization and analysis

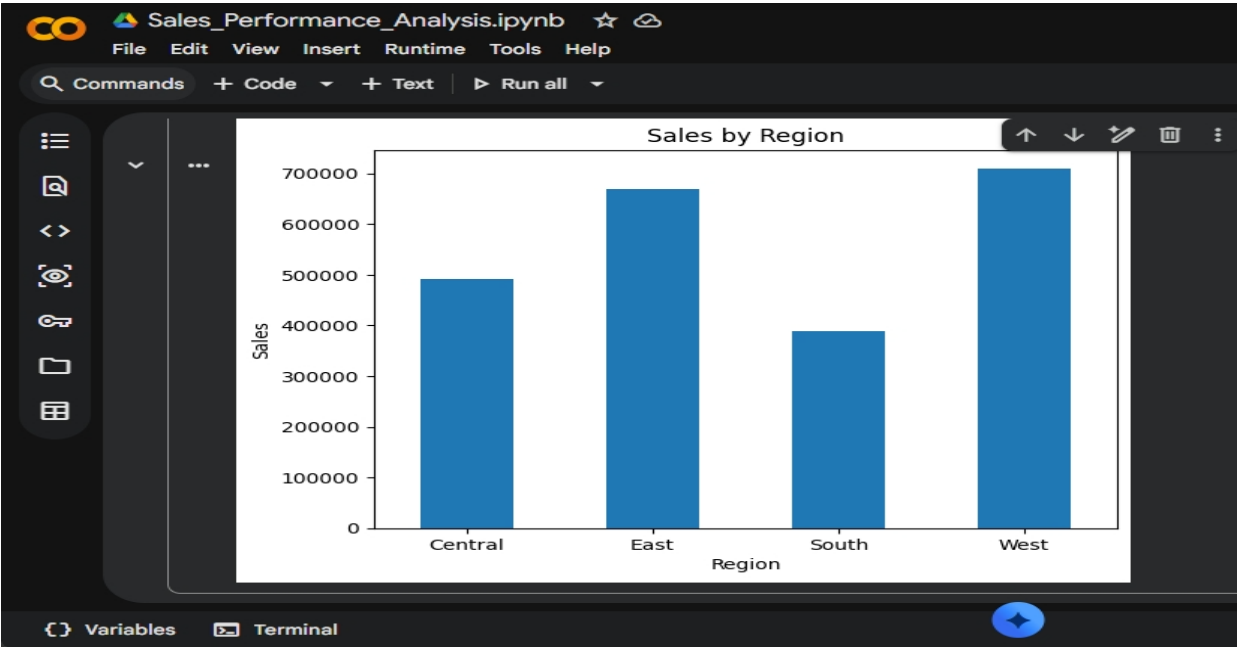

Key Performance Indicators (KPIs)

Key	Value
Total Revenue	\$2,261,536.78

Average Order Value	\$230.77
---------------------	----------

Visualizations:

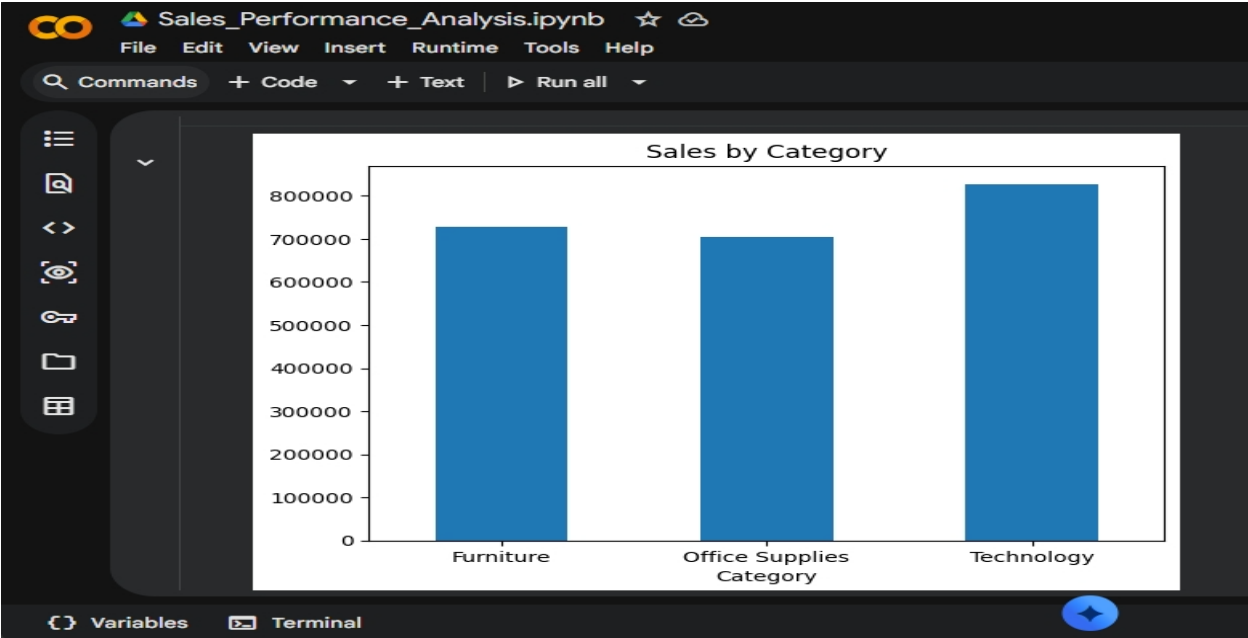

Sales by Region

Observation:

The West region generated the highest sales revenue, while the South region recorded the lowest sales.

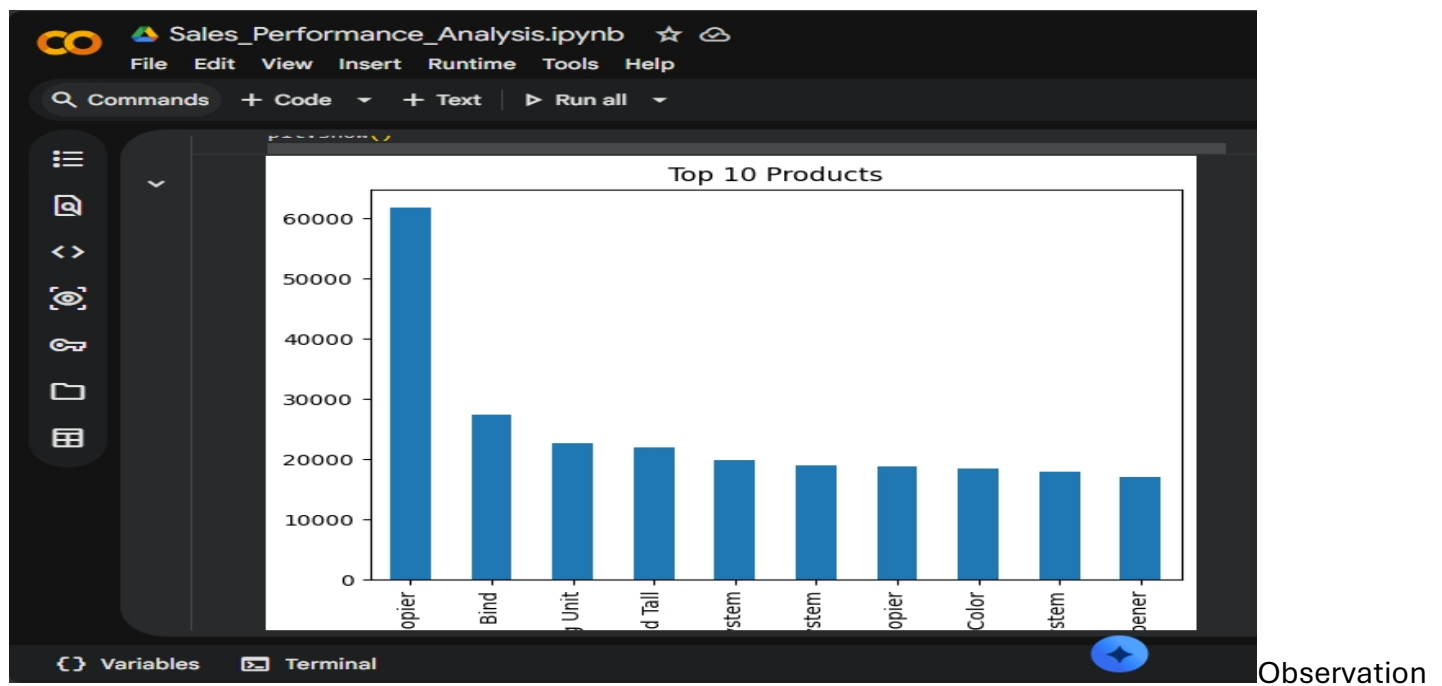

Sales by Category

Observation:

Technology products generated the highest revenue among all product categories.

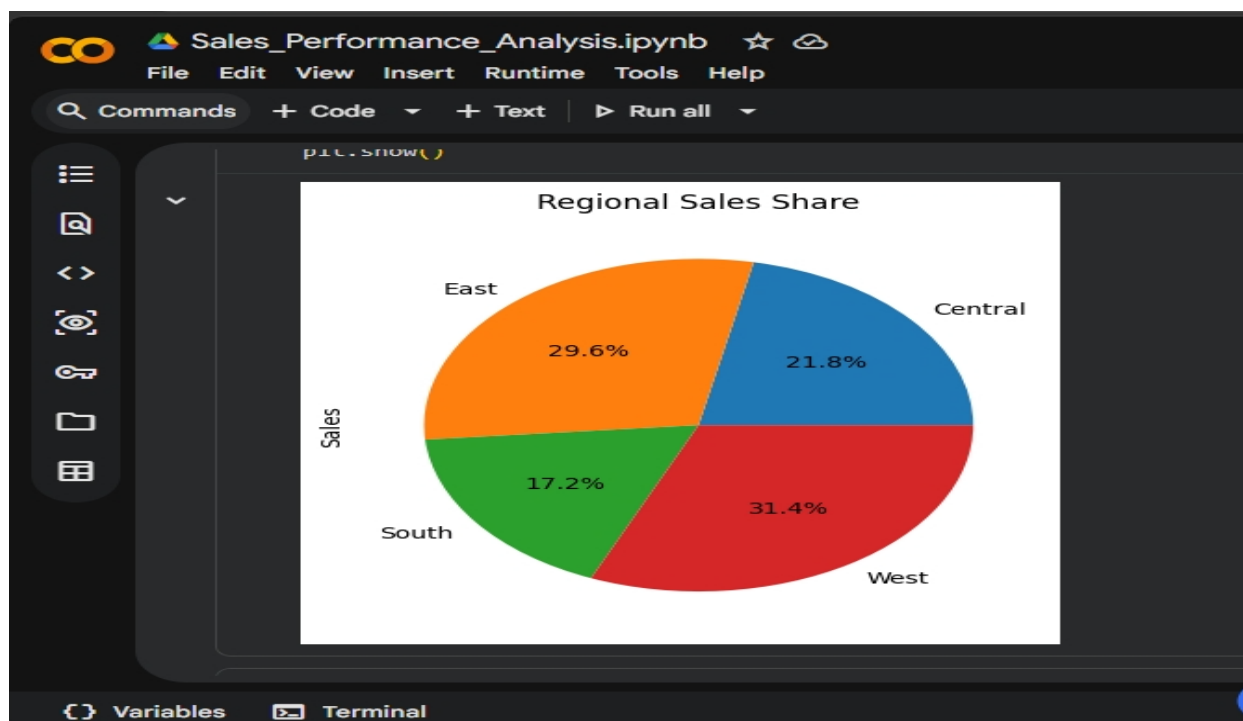

Top 10 Products by Sales

Observation :

A small number of products contribute significantly to overall sales revenue.

Regional Sales Share

Observation:

Sales distribution varies across regions, with West contributing the largest share.

Regional Performance Analysis

Region	Sales
Central	\$492,646.91
East	\$669,518.73
South	\$389,151.46
West	\$710,219.68

Analysis

- West is the highest-performing region.
- South is the lowest-performing region.
- East also contributes significantly to total sales.
- Regional performance varies considerably.

Category Performance Analysis

Category	Sales
Furniture	\$728,658.58
Office Supplies	\$705,422.33
Technology	\$827,455.87

Analysis

- Technology is the best-performing category.
- Furniture contributes strong revenue.
- Office Supplies generates the lowest sales among categories.

Key Findings

1. Total revenue generated was \$2.26 million.
2. Average order value was \$230.77.
3. West region achieved the highest sales performance.
4. South region recorded the lowest sales performance.
5. Technology category generated the highest revenue.
6. Regional performance differences suggest opportunities for targeted marketing.

Recommendations

1. Increase marketing investment in high-performing regions such as West.
2. Introduce targeted campaigns to improve sales in the South region.
3. Expand Technology product offerings to meet customer demand.

4. Bundle Office Supplies with Technology products to increase cross-selling opportunities.
5. Use region-specific promotional strategies to improve sales performance.

Conclusion

The sales performance analysis successfully identified major revenue drivers across regions and product categories. The West region and Technology category emerged as the strongest contributors to overall sales. By focusing on underperforming regions and expanding successful product lines, Alfido Tech can improve business growth and maximize revenue opportunities.
